Tabit Technologies Opens New U.S. Headquarters in Miami

MIAMI, FL (Dec. 28, 2022) — Tabit Technologies, a mobile-first hospitality platform, announced the grand opening of its new U.S. headquarters. With almost 5,500 square feet, the office is located strategically in the hospitality hub of Miami, Florida.

"Miami is a city of technological innovation and opportunity, which makes it a great fit for us," said Tabit co-founder and President Nadav Solomon. "This new space gives us a strategic opportunity to bring on new talent and better serve our partners as we continue to grow."

The Miami office serves as Tabit's corporate headquarters in the U.S. and will house 70 employees once expanded. Tabit's software implements mobile technology to provide a business process-oriented solution for hospitality establishments. The innovative and unique design of the space mirrors the company's focus on mobile technology and innovation.

"We are passionate about helping restaurant and hotel owners and operators utilize technology as a solution to improve their businesses," said Tabit Director of Solutions Management Dror Ben-David. "Our new office in Miami will enable us to gain the support we need to continue expansion into other regions."

Since launching U.S. operations in 2020, Tabit has seen substantial growth and development. The company now serves thousands of restaurants and hotels globally and has over 300 employees with offices in New York City, NY; Little Rock, AR; Boise, ID; Charleston, SC; Detroit, MI and Dallas, TX.

About Tabit Technologies, Inc.
Tabit Technologies is an industry leading restaurant POS and hospitality technology company. Tabit offers a full suite of innovative, overlapping solutions, ultimately resulting in an

all-encompassing, intelligently-designed technology ecosystem. Tabit implements mobile technology to provide a business-process-oriented solution for restaurants and hotels. Tabit's user interface brings the smartphone experience to hospitality, with a simple and intuitive design that requires minimal onboarding. With Tabit, restaurants can utilize 20% fewer servers per shift and see an 80% decrease in server mistakes. Tabit protects against third-party fees which can be up to 4% on credit card processing and up to 40% on online orders and delivery. Tabit's hotel PMS integration bridges the gap between POS and PMS by providing hospitality establishments the ability to create a valuable data stream that improves accuracy, prevents losses and delivers a winning guest experience.

Compatible with leading PMS solutions like Stayntouch, Oracle OPERA, and roomMaster, the tool integrates guest charges by name and room number, and allows convenient functionality, including mobile ordering throughout a resort, hotel or casino. Tabit is trusted by hundreds of innovative hospitality establishments globally, including Sugar Factory, Gianni's at the former Versace Mansion, Max Brenner and KYU, and hotels ranging from boutique establishments like The Setai Hotel Group to full-service and luxury hotels.
